In the article titled “Projected Changes in Precipitation Extremes over Shaanxi Province, China, in the 21st Century” [1], 2 additional references should have been cited included in the text below as references 43 [2] and 44 [3]. Accordingly, the sentence referring to the model output data in Section 2.2, Model and Data, should read as follows.

The model output data over Shaanxi province obtained by the Xuejie Gao research group were used for the study, and more information about the model and simulation could be found in studies by Gao et al. [43, 44].

The Acknowledgments section should also be updated as follows.

The authors are grateful to the Xuejie Gao research group from the LASG in the Institute of Atmospheric Physics, the Chinese Academy of Sciences, for providing model output data of RegCM4 used in this study. This research was funded by the 2018 Open Research Program of LASG in the Institute of Atmospheric Physics, the Chinese Academy of Sciences, and Research Program of Beijing Construction Engineering Group (SGGA1427000000002016002).
